

Geography Scramble Volume 4

Europe

In this geography scramble, you have thirty-six countries to correctly identify. You have two clues to help you identify them—their size/shape and their capital cities. But to find the name of the capital, you have to do some unscrambling first!

Write the name of the country on the top line beside the number and the name of the capital on the second line.

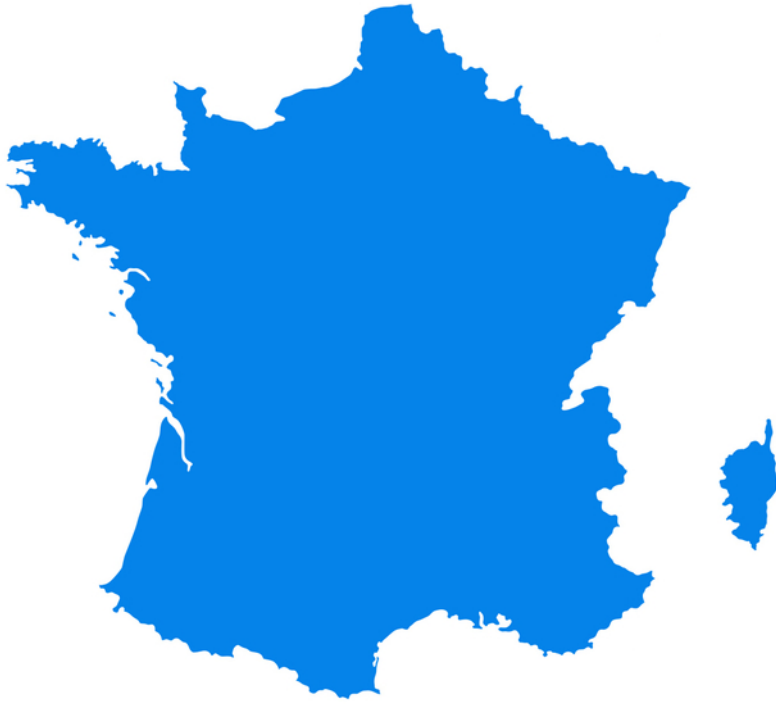

Have fun, and see how many you can get right!
