# Animal Parts Terminology

Abdomen — Adductor — Antennae — Antlers
Beak — Carapace — Cephalothorax
Chelicerae — Down — Flight feathers

| | |
|---|---|
| Abdomen | the last section of an arthropod's body; located behind the thorax |
| Adductor | strong muscle used by some bivalves to pull their shells together very tightly |
| Antennae | slender organs used by some animals for sensing |
| Antlers | pair of bony growths on the head of a member of the deer family |
| Beak | the hard part that covers a bird's mouth; bill |
| Carapace | hard shell on the back of certain animals |
| Cephalothorax | part of some animals that includes the head and thorax |
| Chelicerae | pair of mouth parts of an arachnid |
| Down | small fluffy feathers found between the outer feathers on some birds |
| Flight feathers | long, large feathers on a bird's wings and tail |

# Animal Parts Terminology

Frenulum — Hooves — Hump — Mane
Nematocysts — Osculum — Pedipalps
Proboscis — Scales — Spinnerets

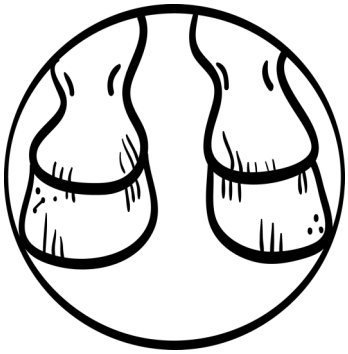

| | |
|---|---|
| Frenulum | part of a moth that couples the forewing to the hindwing so they can work together to fly |
| Hooves | hard coverings that protect the feet of certain animals |
| Hump | a lump on the backs of some animals, often stores fat for food |
| Mane | growth of hair, often long and thick, on the head or neck of certain animals |
| Nematocysts | stinging cells |
| Osculum | large pore in the body of a sponge that allows water to leave the body |
| Pedipalps | parts of some animals that look like legs but are really part of the mouth |
| Proboscis | a long tube that some animals use to suck nectar and other liquids |
| Scales | small plate-type coverings on the bodies of some animals |
| Spinnerets | organs of some animals that spin the silk special organs produce |

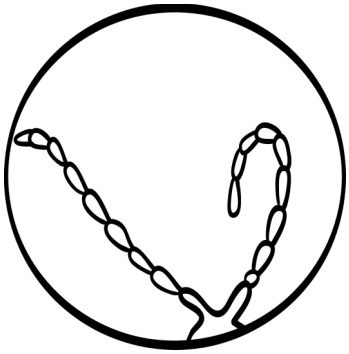

# Animal Parts Terminology

## Spiracle — Stinger
## Tentacles — Thorax — Tusks

| | |
|---|---|
| Spiracle | hole or opening used for breathing |
| Stinger | an organ on some animals sharp enough to pierce an enemy and inject poison |
| Tentacles | flexible projections, especially on the head or near the mouth of some animals |
| Thorax | the middle section of an insect's body; located between the head and abdomen |
| Tusks | long, large teeth that protrude from the mouth of certain animals |

Abdomen: the last section of an arthropod's body; located behind the thorax

Abdomen: the last section of an arthropod's body; located behind the thorax

Adductor: strong muscle used by some bivalves to pull their shells together very tightly

Adductor: strong muscle used by some bivalves to pull their shells together very tightly

Antennae: slender organs used by some animals for sensing

Antennae: slender organs used by some animals for sensing

Antlers: pair of bony growths on the head of a member of the deer family

Antlers: pair of bony growths on the head of a member of the deer family

Beak: the hard part that covers a bird's mouth; bill

Beak: the hard part that covers a bird's mouth; bill

Carapace: hard shell on the back of certain animals

Carapace: hard shell on the back of certain animals

Cephalothorax: part of some animals that includes the head and thorax

Cephalothorax: part of some animals that includes the head and thorax

Chelicerae: pair of mouth parts of an arachnid

Chelicerae: pair of mouth parts of an arachnid

Down: small fluffy feathers found between the outer feathers on some birds

Down: small fluffy feathers found between the outer feathers on some birds

Flight feathers: long, large feathers on a bird's wings and tail

Flight feathers: long, large feathers on a bird's wings and tail

Frenulum: part of a moth that couples the forewing to the hindwing so they can work together to fly
