Practicing Addition

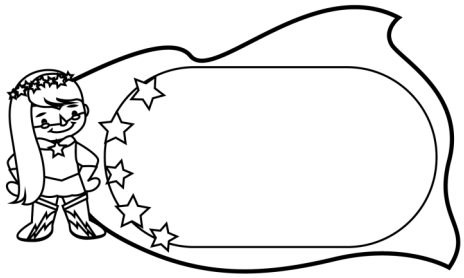

Be a superhero in math! Write each addition problem on the lines for practice.

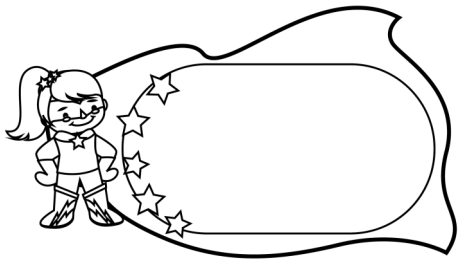

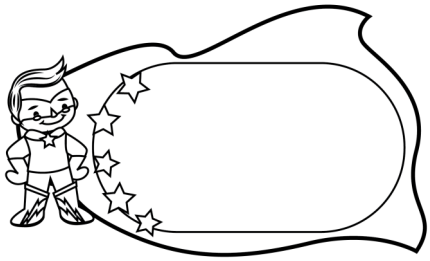

1 + 0 = 1	_____	2 + 0 = 2	_____
1 + 1 = 2	_____	2 + 1 = 3	_____
1 + 2 = 3	_____	2 + 2 = 4	_____
1 + 3 = 4	_____	2 + 3 = 5	_____
1 + 4 = 5	_____	2 + 4 = 6	_____
1 + 5 = 6	_____	2 + 5 = 7	_____
1 + 6 = 7	_____	2 + 6 = 8	_____
1 + 7 = 8	_____	2 + 7 = 9	_____
1 + 8 = 9	_____	2 + 8 = 10	_____
1 + 9 = 10	_____	2 + 9 = 11	_____
1 + 10 = 11	_____	2 + 10 = 12	_____
1 + 11 = 12	_____	2 + 11 = 13	_____
1 + 12 = 13	_____	2 + 12 = 14	_____

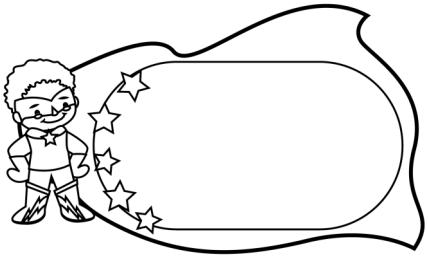

Practice Fun

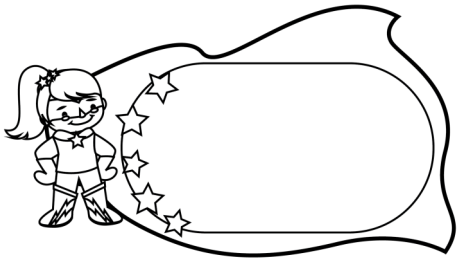

Write the answer to each of the addition problems. Even superheroes have to practice to get better at what they do.

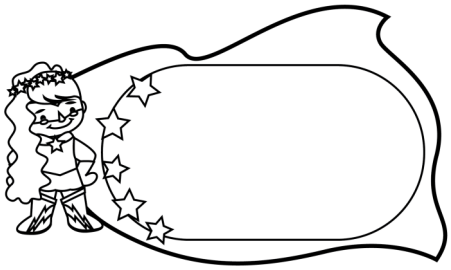

2 + 2 = 

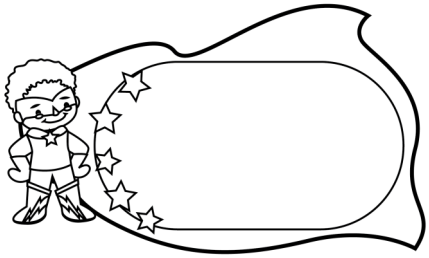

1 + 6 = 

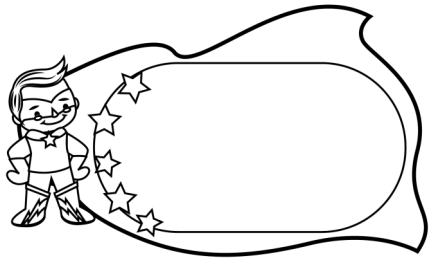

1 + 4 = 

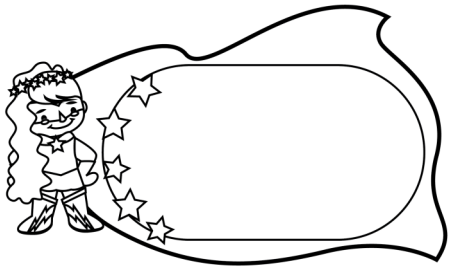

2 + 8 = 

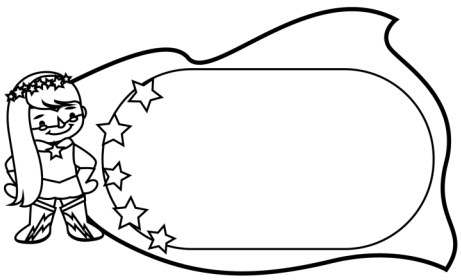

2 + 5 = 

1 + 8 = 

1 + 2 = 

2 + 6 = 

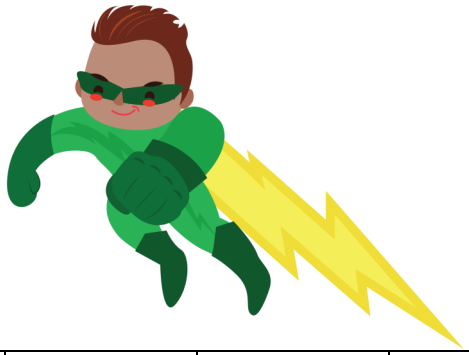

2 + 4 = 

1 + 5 = 

Another Way to Practice

Superheroes learn more than one way to do things. It helps to know different ways to get a task done. Practice the addition problems by filling in the charts. The first problem is done for you.

Speed Practice

Superheroes often have to be fast—but they also have to be careful and do things right. See how fast you can do these speed practices. Try one practice each day. See if you can get them right and do them in less time each day.

I want to sail my own boat and take people fishing. I will need to be able to figure out how far from shore I am and how much to charge people for the time I spend taking them fishing. I will also need to know how much the boat will carry so I know how many people I can take fishing at one time. Math is important!

I want to own a company and drive a moving van. I will need math to figure out how much my truck will carry. I will also need to know how many miles I can get out of my fuel so I can figure out how much to charge for the fuel. I will also need to figure out how much it will cost for tires and repairs on my truck so I can add a little of that into the cost for each trip I make. I really need math!

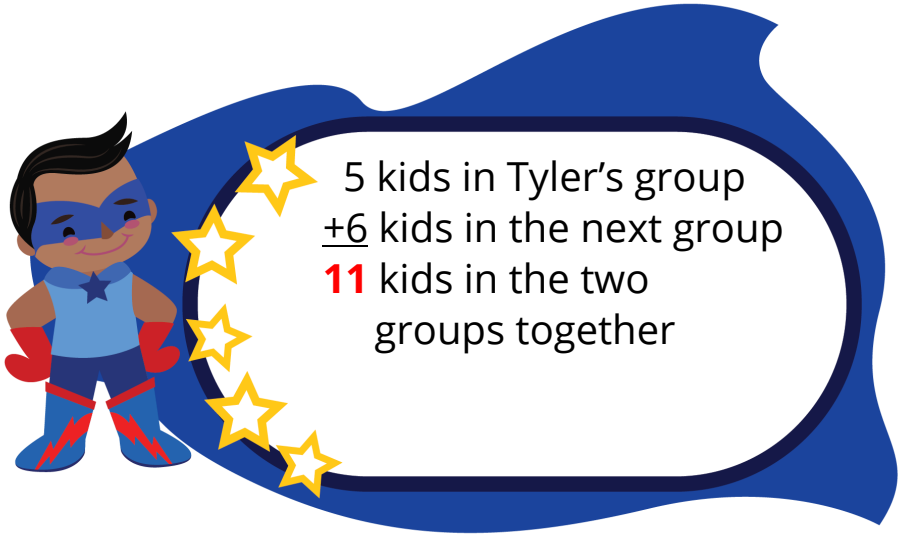

I want to design clothes. I will need math to figure out how much material I need to make each outfit. I will also need math to make sure I have enough thread, buttons, zippers, and decorations to put on the outfit and how much they will cost. Math will help me a lot!

Story Problems

Story problems are sometimes called word problems because the math problem is all in words and you have to decide how to figure it out. Here are some problems that use addition to solve them. The first one is done for you as an example. See if you can figure out the other ones.

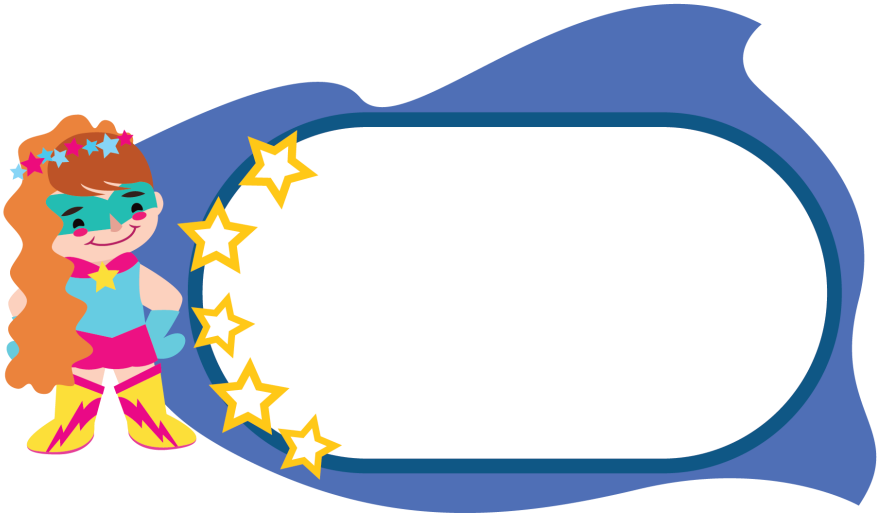

Superhero Tyler wants to know how many kids are in his group at the children's camp and in the group next to his, all together. He has 5 kids in his group, and there are 6 kids in the group next to his. How many kids are there in the two groups together?

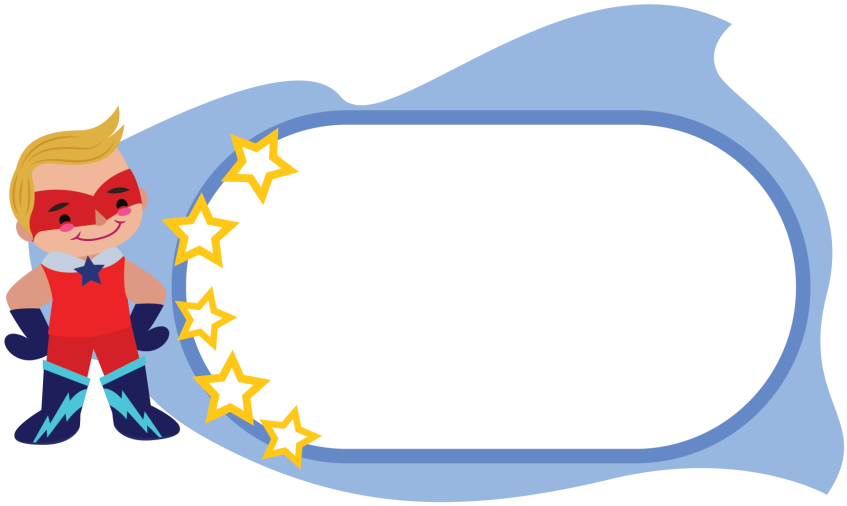

Superhero Casey thinks she needs 5 bottles of water so everyone in her camp group can have one. But, she realizes it is going to get very hot, so she decides to get 5 more bottles of water. How many bottles of water does Casey decide to get all together?

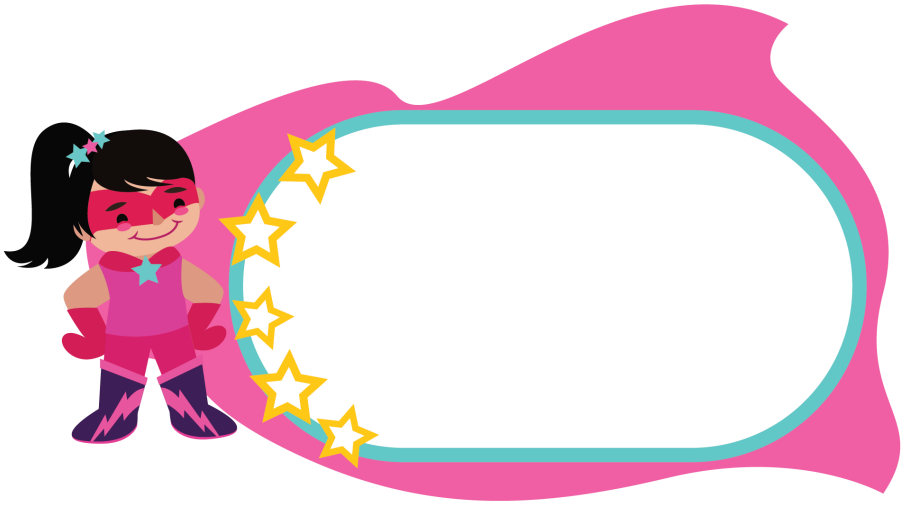

Superhero Ryan is giving pony rides to the kids in his camp group. He gives 6 pony rides in the morning and 6 rides in the afternoon. How many pony rides does that total?

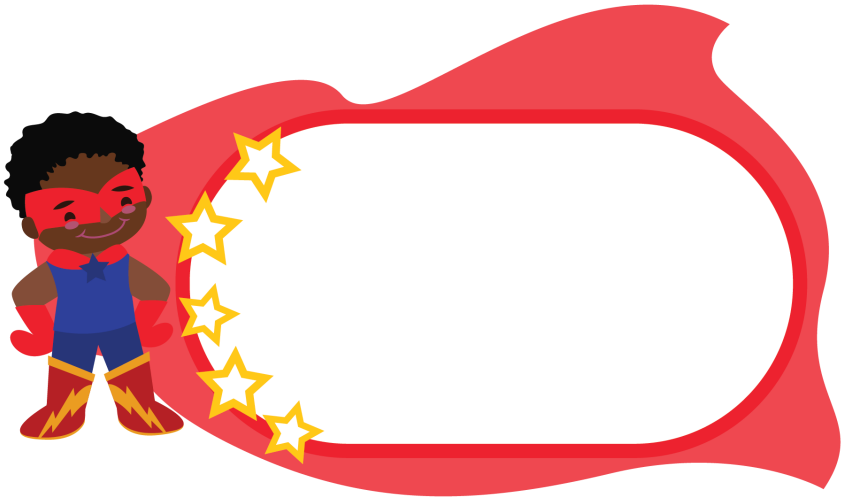

Superhero Dara wants to think of 3 songs for everyone in her camp group to sing around the campfire tonight. She decides to find 6 more songs so there will be enough to sing on other nights. How many total songs does she need?

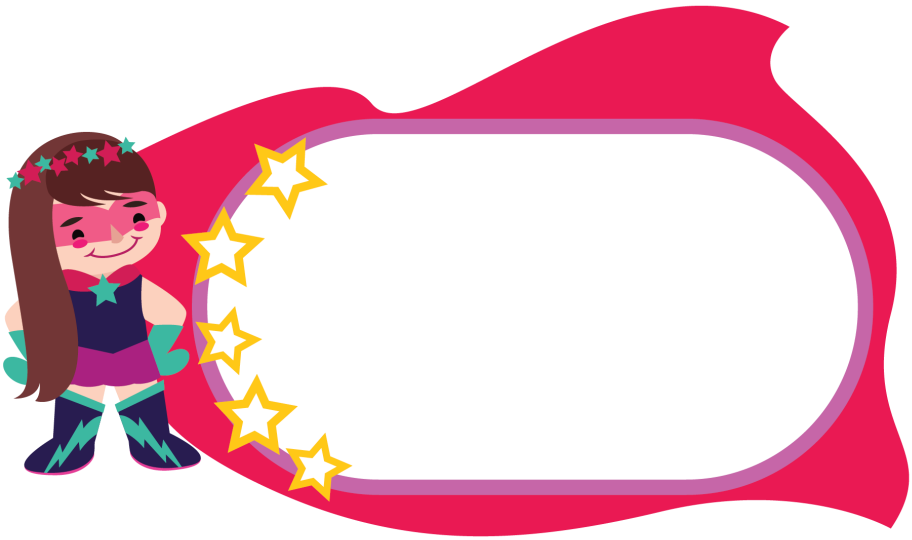

Superhero Micah is bringing prizes for the games at the end of camp. He needs 9 prizes for the games played in the morning. He needs 10 more prizes for the games played in the afternoon. How many total prizes does Micah need to have?

Superhero Kari is helping kids get on the right buses to go to home from camp. The first two buses are ready to leave. Kari helped 12 kids get on the first bus and 11 kids get on the second bus. All together, how many kids did Kari help get on the first two buses?
