

Space is completely silent.
Sound can't travel in space
because there is no air!

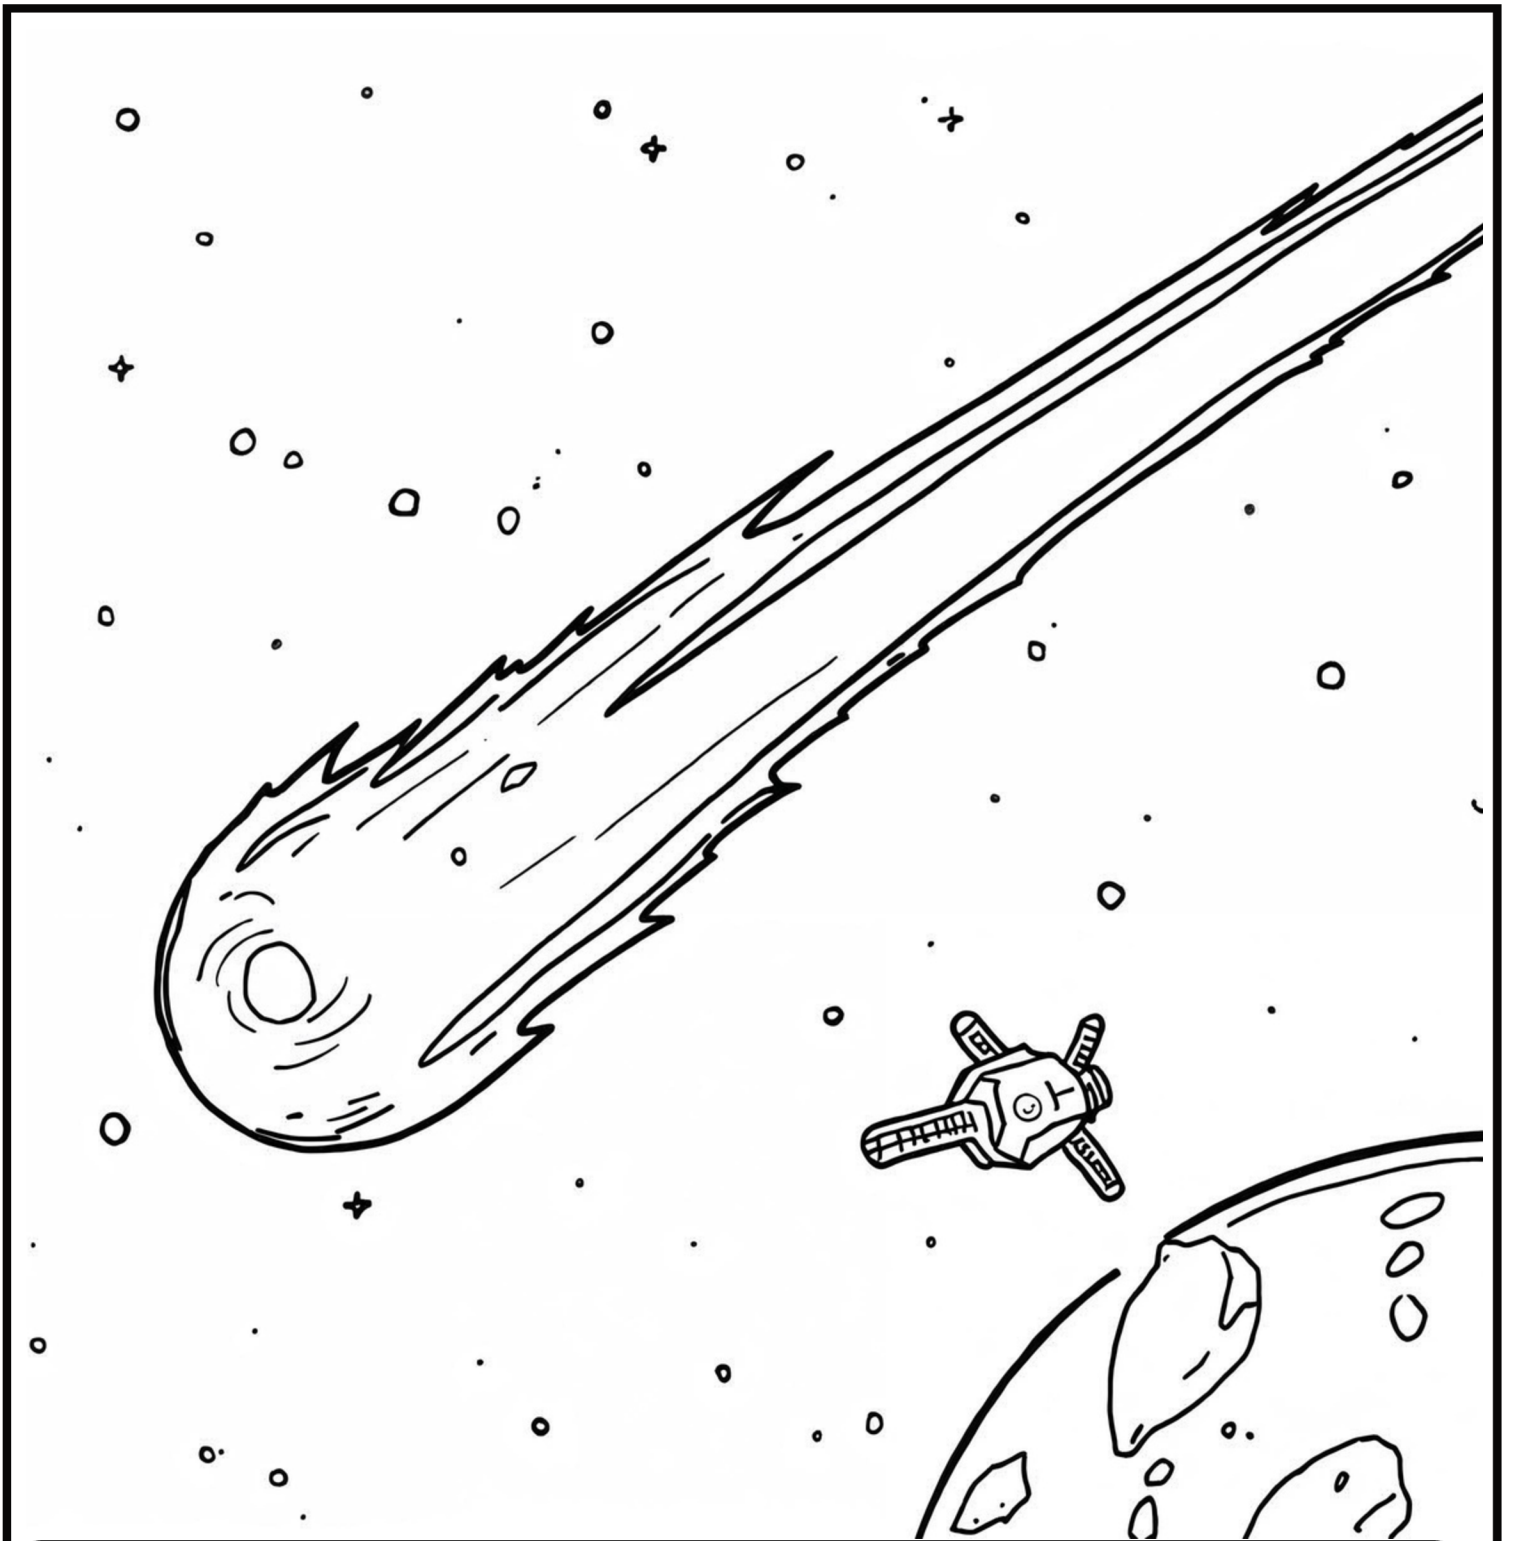

Jupiter's Great Red Spot is a giant storm that has been raging for over 300 years.

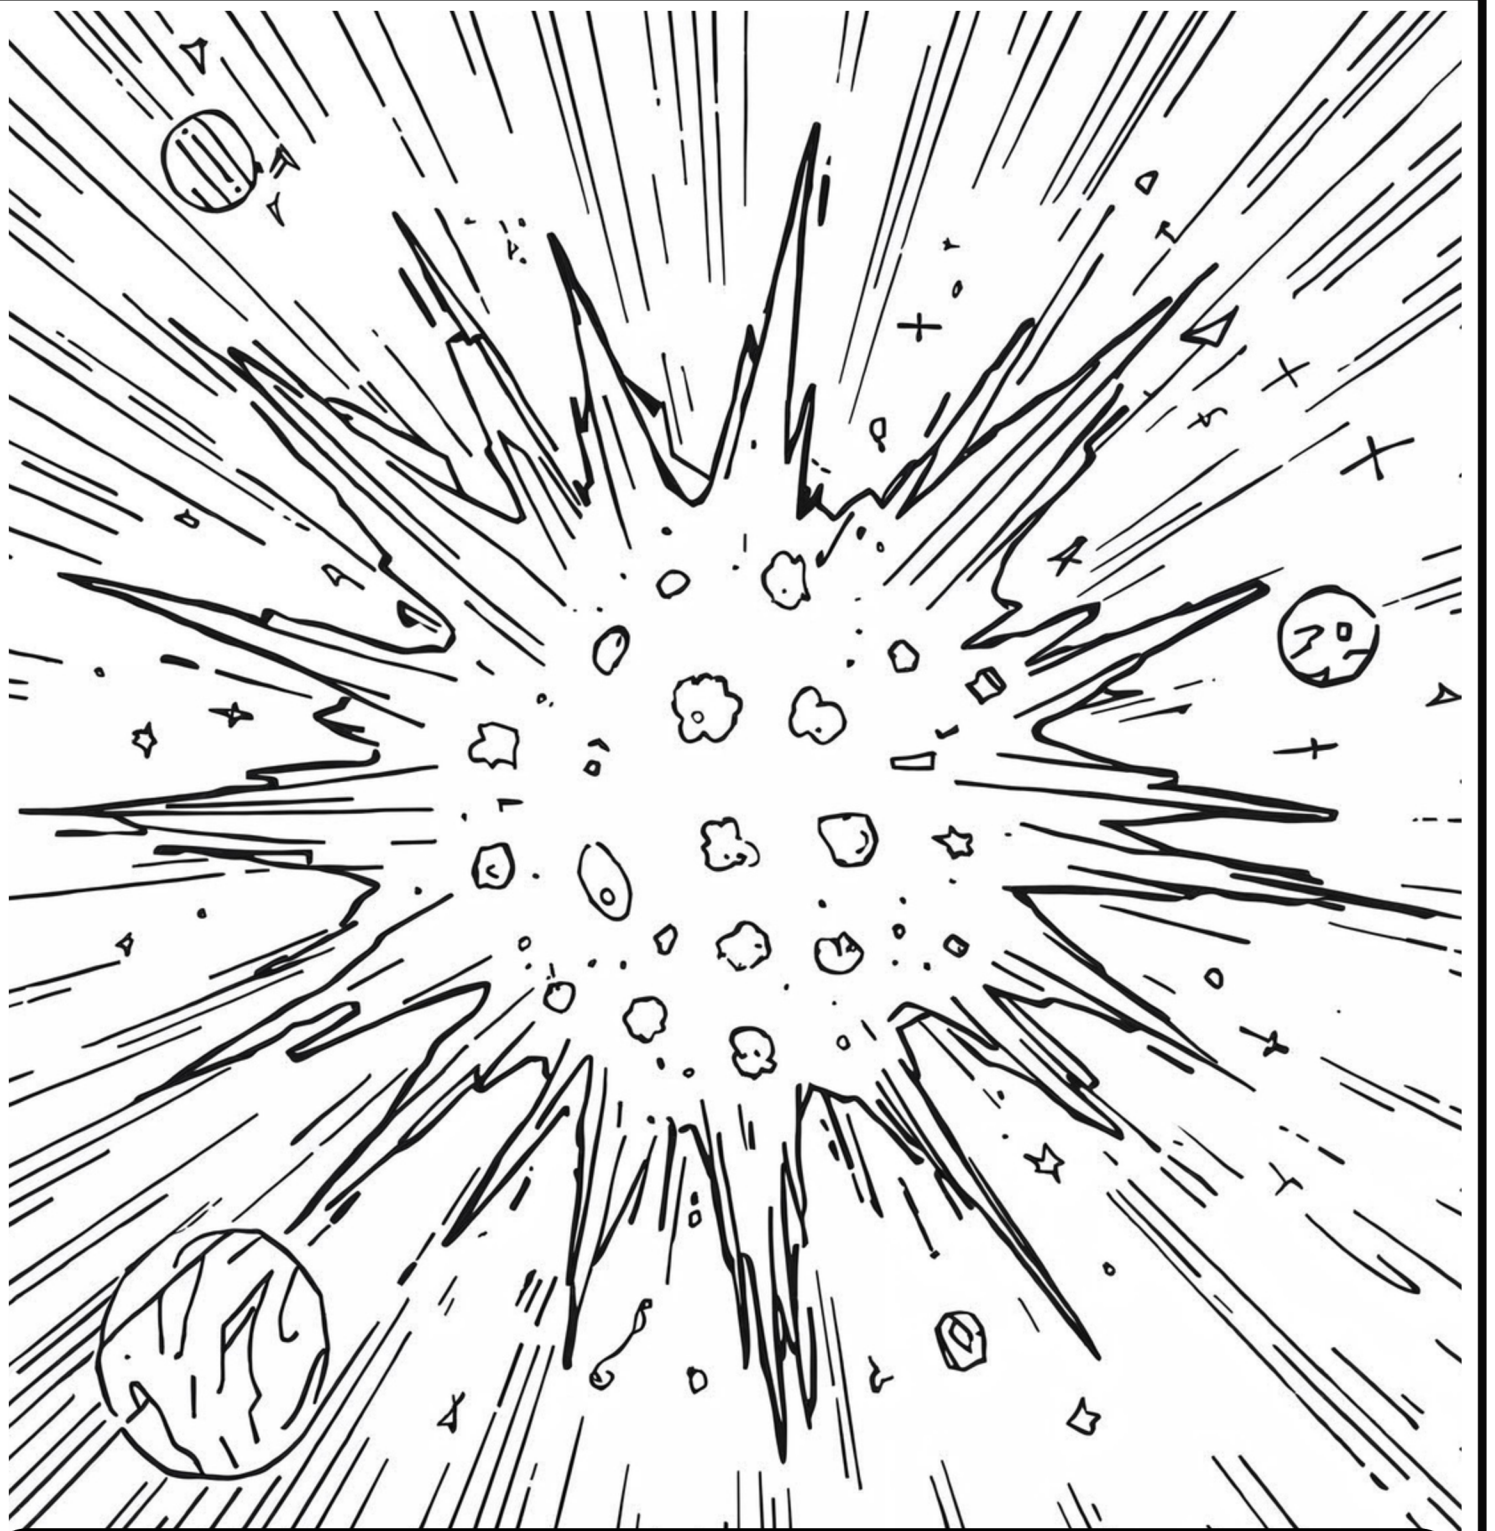

Saturn is the lightest planet —
it could float on water if there
were a bathtub big enough!

Venus spins backward
compared to most planets, so
the Sun rises in the west there.

Halley's Comet visits Earth
about once every 76 years.
The last time was in 1986.

A single supernova can
release more energy than the
Sun will in its entire lifetime.
